

SPACE-TRAC™

PUTTING YOUR SPACE ON TRACK

A MOBILE SYSTEM
INCREASING STORAGE SPACE
UP TO **75%** IN THE SAME FOOTPRINT

IS YOUR BUSINESS OPTIMIZING ITS AVAILABLE STORAGE SPACE, ESPECIALLY IN HIGH-COST AREAS OF THE OPERATION?

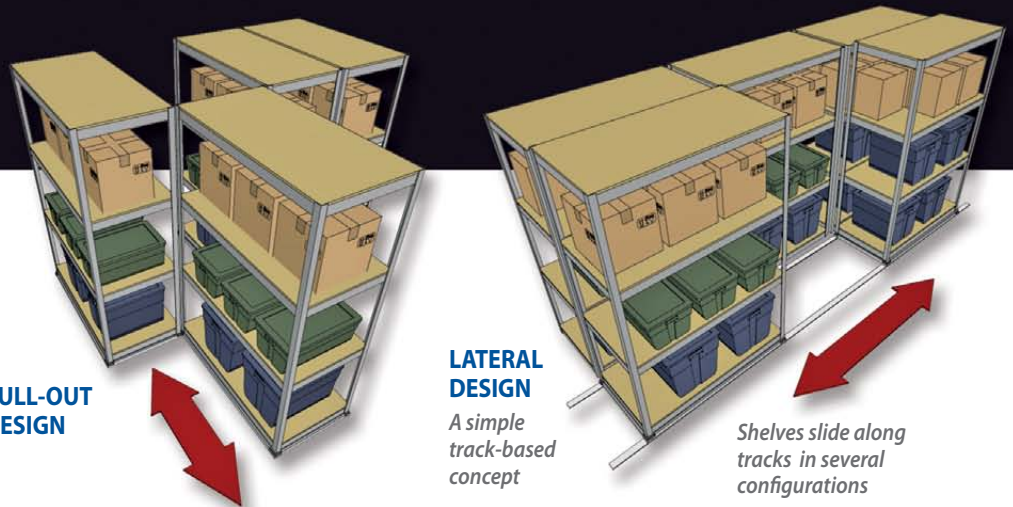

Walk-in coolers and freezers are essential equipment in these markets:

- Convenience
- Restaurant
- Grocery
- Hospital
- Hotel
- Gas station
- Bakery

Conditioned air environments are the most expensive real estate in businesses today. With energy costs increasing, delivery costs and fuel surcharges from suppliers spiraling upward, and ongoing pressure to stock more SKUs, businesses are struggling to get more capacity and value out of their storage areas.

SPACE-TRAC INCREASES YOUR STORAGE CAPACITY BY

SPACE-TRAC's high density storage systems are very effective in saving space and increasing storage capacity by up to 75%.

Added benefits:

- Eliminate the need for multiple access aisles
- Gain easy and full access to all SKUs
- Optimize ventilation for greater efficiency of your cooler/freezer
- Reduce employee safety concerns and minimize moving and lifting
- Improve cleanliness by permitting easy access under shelves

Configure the system that best meets your storage and space needs:

- Pull-out
- Lateral
- Side-by-side

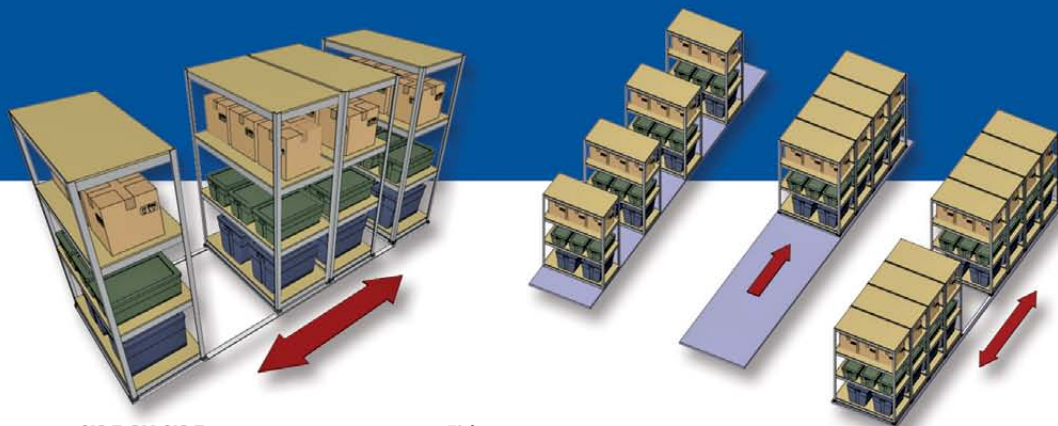

FROM POOR SPACE MANAGEMENT TO A STATE-OF-THE-ART HIGH PERFORMANCE STORAGE SYSTEM

There's more pressure than ever to stock the correct inventory for customers and at the same time respond to the constantly changing product mix from your suppliers. To meet these demands, your storage system should provide:

- Fast and easy access to all stored items
- Effective management of inventory – FIFO (First In, First Out)
- Ability to reduce shrink by managing perishable inventory
- Efficient cube utilization

UP TO 75% WITHOUT ADDING EXPENSIVE REAL ESTATE

SIDE-BY-SIDE DESIGN 100% access to all SKUs

Either compress your current storage area and open up to 50% of the floor space area or increase your storage capacity and in some cases double your storage capacity in the same area.

SPACE-TRAC Storage System Features:

EFFORTLESS STORAGE ACCESS

SPACE-TRAC Manual systems require minimal effort to move – in most cases 6-10 lbs of force. Mechanical systems, only 8–12 lbs of force to turn the crank.

CORROSION RESISTANT

SPACE-TRAC supplies long lasting rust restraint materials & finishes. Perfect for conditioned air environments where degradation occurs due to moisture.

MONEY SAVING – PRODUCTIVITY ENHANCING SYSTEM

SPACE-TRAC mobile carriage solutions offer fast ROI compared to building expansion projects. You can maintain open spaces while increasing storage capacity which leads to increased productivity and revenue generation. We offer an online space-utilization calculator that calculates the cost of your **SPACE-TRAC** system vs. construction & operational costs.

Use your existing wide span or pallet rack shelving

Easy installation and retrofit flexibility

SPACE-TRAC Solutions mobile carriages can be retrofit to your current shelving storage system

- Convert your static shelving to a mobile system
- Retrofit mobile carriages are available in both manual and mechanical assist models

Available in three designs

- Pull-out
 - Lateral
 - Side-by-side
- Consult factory for details

Carriage capacity:

- Manual: up to 1200 lbs
- Mechanical assist: 8000 lbs capacity per wheel assembly (upright to upright)
- Mechanical assist carriages can be designed for shelving and pallet racking

Warranted, long lasting storage solution:

- Attractive design and rugged, durable construction
- Guide tracks are made from 1018 black oxidized steel for rust protection, and high strength aluminum depending on product chosen
- Carriages are galvanized steel or high strength aluminum
- All wheel assemblies/bearings are lifetime lubricated and sealed
- System comes with a 5 year warranty
